Application No. 10/622,368

Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: The prior art reference Aratani was discussed with respect to independent claims 1 and 7. The applicant pointed out evidence as to the difference between the teaching of Aratani and the claim language with respect to the read clock signal and the selection of rows at the frequency of the read clock signal. Therefore, the examiner and applicant reached the agreement that Aratani does not read on the claim language. The examiner also identified another relavent reference, Morita, however, after discussion it was agreed that the reference did not read on the claim language. While it was agreed that the prior art made of record does not teach the claimed invention, a further search would need to be conducted.
